Archer

Archer sprockets are made from one piece (yes one piece). Please check out these features:

- ≡ One piece cold forged sprockets.
- ≡ No welding or press fitting together.
- ≡ Archer sprockets are much stronger and will last longer.
- ≡ Pro Spur (SP type) and Spline & Rim (PD power drive) available.
- ≡ Sprockets fitted with bearings.
- ≡ PD spline sprockets fitted with Rims.
- ≡ Private label available (minimum quantity)
- ≡ Widest range available.
- ≡ We will manufacture all new sprockets or specific sprockets you require.

Archer

The Archer Sprocket Manufacturing System is Quality Assured & Technologically Advanced

Alloy Steel

Heat & Pressed Billet

**Cold Forged
from Separate Dies**

**Finished Sprocket
Specially Heat Treated,
Precision Ground &
Machined**

Archer

RIMS

Archer replacement high quality investment cast rims provide long wear life, whilst maintaining excellent levels of performance

- The rim "floats" on the splined hub, allowing chain and sprocket to self align with the bar groove.
- Chain pitch can be changed without having to replace the entire system.
- The rim absorbs a majority of the sprocket wear and by being replaceable, extends the life and value of the sprocket system.

NOTE: The standard pack quantity for purchasing Archer rims is in multiples of ten.

PMD Technical Tip

Worn sprocket rims are more difficult to detect than worn spur sprockets. PMD strongly recommends a new sprocket with every new saw chain. In the process, you can eradicate many of your customers' concerns regarding chain "stretch" and extends the life of a new chain.

Most sprocket problems are caused by loose chain tension and failure to replace the sprocket or clutch drum when necessary. Sprockets are inexpensive. One worn inexpensive sprocket can quickly damage an expensive chain and bar. Do not try to save money by running new chains on old sprockets. Look for the conditions below and change sprockets and clutch drums promptly.

Rim Sprocket Wear

Concave Marks Worn into Rim Sprocket Teeth

Chain Cannot Mesh Cleanly with Sprocket

Wear On Front and Back of Drive Links
